## Advances in Treating Metastatic Bone Cancer: Summary Statement for the First Cambridge Conference

## Basic Mechanisms Responsible for Osteolytic and Osteoblastic Bone Metastases

Theresa A. Guise, Khalid S. Mohammad, Gregory Clines, Elizabeth G. Stebbins, Darren H. Wong, Linda S. Higgins, Robert Vessella, Eva Corey, Susan Padalecki, Larry Suva, and John M. Chirgwin

## Genomics and Proteomics of Bone Cancer

Aaron G. Marguiles, V. Suzanne Klimberg, Sudeepa Bhattacharrya, Dana Gaddy, and Larry J. Suva

## Molecular Mechanisms of Action of Bisphosphonates: Current Status

Anke J. Roelofs, Keith Thompson, Sharon Gordon, and Michael J. Rogers

## Biology of Bone Cancer Pain

Michael J. Goblirsch, Pawel P. Zwolak, and Denis R. Clohisy

## The Measurement of Pain from Metastatic Bone Disease: Capturing the Patient’s Experience

Charles S. Cleeland

## Clinical Features of Metastatic Bone Disease and Risk of Skeletal Morbidity

Robert E. Coleman

## High-Linear Energy Transfer Irradiation Targeted to Skeletal Metastases by the α-Emitter 223Ra: Adjuvant or Alternative to Conventional Modalities?

Oyvind S. Bruland, Sten Nilsson, Darrell R. Fisher, and Roy H. Larsen

## Breast Cancer: Bisphosphonate Therapy for Metastatic Bone Disease

Jean-Jacques Body

## Multistate Analysis of Skeletal Events in Patients with Bone Metastases

Richard J. Cook and Pierre Major

## New Potential Targets for Treating Myeloma Bone Disease

G. David Roodman

## Wnt Antagonism in Multiple Myeloma: A Potential Cause of Uncoupled Bone Remodeling

Roger N. Pearse

## Treatment for Myeloma Bone Disease

Howard S. Yeh and James R. Berenson

## Targeting Factors Involved in Bone Remodeling as Treatment Strategies in Prostate Cancer

Robert L. Vessella and Eva Corey

## Src Inhibitors in Metastatic Bone Disease

Brendan F. Boyce, Lianping Xing, Zhenqiang Yao, Terohto Yamashita, William C. Shakespeare, Yihan Wang, Chester A. Metcalf III, Raji Sundaramoorthi, David C. Dalgarno, John D. Iuliucci, and Tomi K. Sawyer

## Targeting Bone Metastasis in Prostate Cancer with Endothelin Receptor Antagonists

Michael A. Carducci and Antonio Jimeno

## Oral Bisphosphonates as Adjuvant Therapy for Operable Breast Cancer

Trevor Powles, Eugene McGroskey, and Alexander Paterson

## Future Treatment of Bone Metastases

Allan Lipton

## Skeletal Complications of Breast Cancer Therapies

Angela Hirbe, Elizabeth A. Morgan, Özge Uluçkan, and Katherine Weilbaecher

## Treatment-Related Osteoporosis in Men with Prostate Cancer

Matthew R. Smith
