Zaidi, Manuela Tamburo de Bella, Martin J. Slade, Stephen B. Marley, Myrtle Y.A. Gordon, Robert S. Coffin, R. Charles Combes, and Tahereh Kamalati ................................................................. 6853
About the Cover

FISH analysis of 9p21 locus in HPV16-positive oropharyngeal squamous cell carcinoma. The cytogenetic analysis was performed using a CEP9/9p21 probe to interphasic nuclei. The nuclei showed a normal disomic hybridization pattern of 9p21 represented by two centromere 9 signals (green spots) coupled with two 9p21 signals (red spots). For further details, please see Perrone et al. on page 6643 in this issue.
