### About the Cover

MMP-2 expression in tumor-associated macrophages. Shown here is immunofluorescence co-localization (yellow) of macrophages (red) and MMP-2 (green) in a high-grade invasive epithelial ovarian carcinoma (nuclei are stained with Hoechst [blue]). Negative biobehavioral factors such as depressive symptoms and life stress were associated with significantly higher MMP-9 levels in tumor-associated macrophages. For further details, please see the report by Lutgendorf and colleagues on page 6839 of this issue.
