## Cancer Susceptibility and Prevention

---

**Molecular Alterations in Spontaneous Sputum of Cancer-Free Heavy Smokers: Results from a Large Screening Program.** Ekaterina Baryshnikova, Annarita Destro, Maurizio Valentino Infante, Silvio Cavuto, Umberto Cariboni, Marco Alloisio, Giovanni Luca Ceresoli, Romano Lutman, Giorgio Brambilla, Giuseppe Chiesa, Gianni Ravasi, and Massimo Roncalli.....1913

## Letters to the Editor

---

**Does Erythropoietin Promote Tumor Growth?** Donghoon Yoon, Neeraj Agarwal, and Josef T. Prchal.....1920

**Reply to the Letter to the Editor from Yoon et al.** Pierre Saintigny, Benjamin Besse, Jean-Charles Soria, Jean-François Bernaudin, and Patrice Callard.....1920

---

## About the Cover

A side population of glioma stem-like cells was isolated from the C6 lacZ7 glioma cell line (transfected with  $\beta$ -galactosidase) and engrafted into rat spinal cord. After 7 days tissue was collected and immunostained for  $\beta$ -galactosidase (*red*) to detect tumor cells and nestin (*green*), which stains both C6 tumor cells and progenitor cells. Tumor cells ( $\beta$ -galactosidase, *red*) that also express nestin are seen as yellow. Many nestin-positive cells were  $\beta$ -galactosidase negative, indicating they were not tumor cells but probably were neural or endothelial progenitor cells recruited to the tumor site. Nuclei are labeled with Hoechst dye (*blue*). For further details, please see Gilg and colleagues on page 1804 in this issue.
