## Editorial

**Eribulin: Rediscovering Tubulin as an Anticancer Target.** Antonio Jimeno .......................................................... 3903

□□ Commentary on Goel et al., p. 4207 and Tan et al., p. 4213

## CCR Translations

**Toward an Effective Targeted Chemotherapy for Multiple Myeloma.** Andrew G. Polson and Mark X. Sliwkowski ................................................................. 3906

□□ Commentary on Ikeda et al., p. 4028

## CCR Practice of Translational Oncology

**Successes and Challenges in Translational Research: The Development of Targeted Therapy for Gastrointestinal Stromal Tumours.** Daniel J. Renouf, Lora Wilson, and Charles D. Blanke ........... 3908

## Molecular Pathways

**Targeting NEDD8-Activated Cullin-RING Ligases for the Treatment of Cancer.** Teresa A. Soucy, Peter G. Smith, and Mark Rolfe ................................................................. 3912

## CCR Special Focus

**From the Editor.** Susan E. Bates ................................................................. 3917

**Epigenetic Modifiers: Basic Understanding and Clinical Development.** Richard L. Piekarz and Susan E. Bates ................................................................. 3918

**Cancer DNA Methylation: Molecular Mechanisms and Clinical Implications.** Michael T. McCabe, Johann C. Brandes, and Paula M. Vertino ................................................................. 3927

**Targeting DNA Methylation.** Jean-Pierre J. Issa and Hagop M. Kantarjian ................................................................. 3938

**Cytotoxicity Mediated by Histone Deacetylase Inhibitors in Cancer Cells: Mechanisms and Potential Clinical Implications.** David S. Schrump ................................................................. 3947

**Clinical Studies of Histone Deacetylase Inhibitors.** H. Miles Prince, Mark J. Bishton, and Simon J. Harrison ................................................................. 3958

**Rational Combinations Using HDAC Inhibitors.** Michael Bots and Ricky W. Johnstone ................................................................. 3970

## Human Cancer Biology

**Global Gene Expression Analysis of Reactive Stroma in Prostate Cancer.** Olga Dakhova, Mustafa Ozen, Chad J. Creighton, Rile Li, Gustavo Ayala, David Rowley, and Michael Ittmann ................................................................. 3979

**GATA4 and GATA5 are Potential Tumor Suppressors and Biomarkers in Colorectal Cancer.** Debby M.E.I. Hellebrekers, Marjolein H.F.M. Lentjes, Sandra M. van den Bosch, Veerle Melotte, Kim A.D. Wouters, Kathleen L.J. Daenen, Kim M. Smits, Yoshimitsu Akiyama, Yasuhiro Yuasa, Silvia Sanduleanu, Carolina A.J. Khalid-de Bakker, Daisy Jonkers, Matty P. Weijenber, Joost Louwagie, Wim van Crickeing, Beatriz Carvalho, Gerrit A. Meijer, Stephen B. Baylin, James G. Herman, Adriaan P. de Bruine, and Manon van Engeland ................................................................. 3990

**MiR-21 Indicates Poor Prognosis in Tongue Squamous Cell Carcinomas as an Apoptosis Inhibitor.** Jinsong Li, Hongzhang Huang, Lijuan Sun, Mei Yang, Chaobin Pan, Weiliang Chen, Donghui Wu, Zhaoyu Lin, Chunchuan Zeng, Yandong Yao, Peter Zhang, and Erwei Song ................................................................. 3998

**Locked Nucleic Acid In situ Hybridization Analysis of miR-21 Expression during Colorectal Cancer Development.** Nobutake Yoshitomi, Ryoichi Shimomura, Sen-ichi Inada, Kouhei Sakurai, Takeshi Haraguchi, Yuka Ozaki, Shuji Fujita, Takanori Mizutani, Chihiro Furukawa, Mitsunori Fujishiro, Masao Ichinose, Kazuya Shigomma, Yuka Otsutsuki, Masao Omata, and Hideo Iba ................................................................. 4009
Fibroblast Growth Factor Receptor 2–Positive Fibroblasts Provide a Suitable Microenvironment for Tumor Development and Progression in Esophageal Carcinoma. Chunyu Zhang, Li Fu, Jianhua Fu, Liang Hu, Hong Yang, Tie-Hua Rong, Yan Li, Haibo Liu, Song-Bin Fu, Yi-Xin Zeng, and Xin-Yuan Guan...........................................................................................................................................4017

Cancer Therapy: Preclinical

The Monoclonal Antibody nBT062 Conjugated to Cytotoxic Maytansinoids Has Selective Cytotoxicity Against CD138-Positive Multiple Myeloma Cells In vitro and In vivo. Hiroshi Ikeda, Teru Hideshima, Mariateresa Fulciniti, Robert J. Lutz, Hiroshi Yasui, Yutaka Okawa, Tanyel Kiziltepe, Sonia Vallet, Samantha Pozzi, Loredana Santo, Giulia Perrone, Yu-Tzu Tai, Diana Cirstea, Noopur S. Raje, Christoph Uherek, Benjamin Dälen, Silke Aigner, Frank Osterroth, Nikhil Munshi, Paul Richardson, and Kenneth C. Anderson...................................................................................................4028

CIUDC-305, a Novel Synthetic HSP90 Inhibitor with Unique Pharmacologic Properties for Cancer Therapy. Rudi Bao, Cheng-Jung Lai, Hui Qu, Dagong Wang, Ling Yin, Brian Zifcak, Ruzanna Atoyian, Jang Wang, Maria Samson, Jeffrey Forrester, Steven DellaRocca, Guang-Xin Xu, Xu Tao, Hai-Xiao Zhai, Xiong Cai, and Changgeng Qian ........................................................................................................................................4046

High Efficacy of Panobinostat Towards Human Gastrointestinal Stromal Tumors in a Xenograft Mouse Model. Mitsuru Miyachi, Naoki Kakazu, Shigeki Yagyu, Yoshiki Katsumi, Satoko Tsubai-Shimizu, Ken Kikuchi, Kunihiro Tsuchiya, Tomoko Iehara, and Hajime Hosoi ..................................................................................................................4066

Restoration of p53 Pathway by Nutlin-3 Induces Cell Cycle Arrest and Apoptosis in Human Rhabdomysarcoma Cells. Mitsuco Floris, Maria Debic-Rychter, Ralf Sciot, Cristiana Stefan, Steffen Feuws, Kathleen Machiels, Peter Atadja, Agnieszka Wozniak, Gavino Fa, and Patrick Schöffski ........................................................................................................4077

Impaired STAT Phosphorylation in T Cells from Melanoma Patients in Response to IL-2: Association with Clinical Stage. Roberta Mortarini, Claudia Vegetti, Alessandra Molla, Flavio Arienti, Fernando Ravagnani, Andrea Maurichi, Roberto Patuzzo, Mario Santinami, and Andrea Anichini ........................................................................................................4085

MMP11: A Novel Target Antigen for Cancer Immunotherapy. Daniela Peruzzi, Federica Mori, Antonella Conforti, Domenico Lazzaro, Emanuele De Rinaldis, Gennaro Califari, Nicola La Monica, and Luigi Aurisicchio ........................................................................................................4104

Extranuclear Coactivator Signaling Confers Insensitivity to Tamoxifen. Rakesh Kumar, Hao Zhang, Caroline Holm, Ratna K. Vadlamudi, Goran Landberg, and Suresh K. Rayala ........................................................................................................4123

Antitumor Effects and Biomarkers of Activity of AZD0530, a Src Inhibitor, in Pancreatic Cancer. N. V. Rajeshkumar, Aik Choon Tan, Elizabeth De Oliveira, Chris Womack, Helen Wombwell, Shethlah Morgan, Madhuri V. Warren, Jill Walker, Tim P. Green, Antonio Jimeno, Wells A. Messersmith, and Manuel Hidalgo

Suppression of HER2/HER3-Mediated Growth of Breast Cancer Cells with Combinations of GDC-0941 PI3K Inhibitor, Trastuzumab, and Pertuzumab. Evelyn Yao, Wei Zhou, Si Tuen Lee-Hoeflich, Tom Truong, Peter M. Haverty, Jeffrey Eastham-Anderson, Nicholas Lewin-Koh, Bert Gunter, Marcia Belvin, Lesley J. Murray, Lori S. Friedman, Mark X. Sliwkowski, and Klaus P. Hoeflich

High Expression of Mammalian Target of Rapamycin Is Associated with Better Outcome for Patients with Early Stage Lung Adenocarcinoma. Valsamo K. Anagnostou, Gerold Bepler, Konstantinos N. Syrigos, Lynn Tanoue, Scott Getttinger, Robert J. Homer, Daniel Boffa, Frank Detterbeck, and David L. Rimm

Methylation of RASSF1A, RASSF2A, and HIN-1 Is Associated with Poor Outcome after Radiotherapy, but not Surgery, in Oral Squamous Cell Carcinoma. Kuo-Hao Huang, Shiang-Fu Huang, I-How Chen, Chun-Tao Liao, Hung-Ming Wang, and Ling-Ling Hsieh

Local Recurrence after Breast-Conserving Therapy in Relation to Gene Expression Patterns in a Large Series of Patients. Bas Kreike, Hans Halfwerk, Nicola Armstrong, Peter Bult, John A. Foekens, Sanne C. Veltkamp, Dmitry S.A. Nuyten, Harry Bartelink, and Marc J. van de Vijver

Cell Cycle/Apoptosis Molecule Expression Correlates with Imatinib Response in Patients with Advanced Gastrointestinal Stromal Tumors. Salvatore Romeo, Maria Debiec-Rychter, Martine Van Glabbeke, Heidi Van Paassen, Paola Comite, Ronald Van Eijk, Jan Oosting, Jaap Verweij, Philippe Terrier, Ulrike Schneider, Raf Sciot, Jean Yves Blay, and Pancras C.W. Hogendoorn on behalf of the European Organization for Research and Treatment of Cancer Soft Tissue and Bone Sarcoma Group

Changes in Gene Expression Predicting Local Control in Cervical Cancer: Results from Radiation Therapy Oncology Group 0128. Joanne B. Weidhaas, Shu-Xia Li, Kathryn Winter, Janice Ryu, Anuja Jhingran, Bridgette Miller, Adam P. Dicker, and David Gaffney
Association of Breast Cancer Stem Cells Identified by Aldehyde Dehydrogenase 1 Expression with Resistance to Sequential Paclitaxel and Epirubicin-Based Chemotherapy for Breast Cancers. Tomonori Tanei, Koji Morimoto, Kenzo Shimazu, Seung Jin Kim, Yoshio Tanji, Tetsuya Taguchi, Yasuhiro Tamaki, and Shinzaburo Noguchi..........................4234

Susceptibility and Prevention

About the Cover

Reactive stroma from prostate cancer and normal prostatic stroma was laser captured, RNAs were amplified and gene expression analyzed using expression microarrays. A total of 1141 genes were differentially expressed in reactive compared with normal stroma. The Human Protein Reference Database catalogue of over 35,000 known physical protein-protein interactions was queried to determine how the reactive stroma-associated genes relate to each other in terms of interactions between their associated proteins. A total of 292 interactions were visualized as a graphical network. A view of the central node is shown. For further details, please see Dakhova and colleagues on page 3979 in this issue.
