SPECIAL FEATURES

1695 Metformin: A Therapeutic Opportunity in Breast Cancer
Ana M. Gonzalez-Angulo, and Funda Meric-Bernstam

1701 Death Receptor Agonists as a Targeted Therapy for Cancer
Jeffrey Wiezorek, Pamela Holland, and Jonathan Graves

1709 Phase I Clinical Trials: Overcoming Barriers
Susan E. Bates

1710 An Overview of the Optimal Planning, Design, and Conduct of Phase I Studies of New Therapeutics
Patricia M. LoRusso, Scott A. Boerner, and Lesley Seymour

1719 Information Needed to Conduct First-in-Human Oncology Trials in the United States: A View from a Former FDA Medical Reviewer
Adrian M. Senderowicz

1726 Approaches to Phase 1 Clinical Trial Design Focused on Safety, Efficiency, and Selected Patient Populations: A Report from the Clinical Trial Design Task Force of the National Cancer Institute Investigational Drug Steering Committee
S. Percy Ivy, Lillian L. Siu, Elizabeth Garrett-Mayer, and Larry Rubinstein

1737 Performing Phase I Clinical Trials of Anticancer Agents: Perspectives from within the European Union and Japan
Martin D. Forster, Nagahiro Saijo, Lesley Seymour, and Hilary Calvert

Guidelines for the Development and Incorporation of Biomarker Studies in Early Clinical Trials of Novel Agents

GCP Data Quality for Early Clinical Development
Edwin P. Rock, Vernette J. Molloy, and Jeffrey S. Humphrey

The Design of Phase II Clinical Trials Testing Cancer Therapeutics: Consensus Recommendations from the Clinical Trial Design Task Force of the National Cancer Institute Investigational Drug Steering Committee
Lesley Seymour, S. Percy Ivy, Daniel Sargent, David Spriggs, Laurence Baker, Larry Rubinstein, Mark J. Ratain, Michael Le Blanc, David Stewart, John Crowley, Susan Groshen, Jeffrey S. Humphrey, Pamela West, and Donald Berry

HUMAN CANCER BIOLOGY

1781 Overexpression of Smoothened Activates the Sonic Hedgehog Signaling Pathway in Pancreatic Cancer–Associated Fibroblasts
Kimberly Walter, Noriyuki Omura, Seung-Mo Hong, Margaret Griffith, Audrey Vincent, Michael Borges, and Michael Goggins

New Developments in Tyrosine Kinase Inhibitor Therapy for Newly Diagnosed Chronic Myeloid Leukemia
Philipp le Coutre, Michaela Schwarz, and Theo D. Kim

Performing Phase I Clinical Trials of Anticancer Agents: Perspectives from within the European Union and Japan
Martin D. Forster, Nagahiro Saijo, Lesley Seymour, and Hilary Calvert

ABOUT THE COVER

Human pancreatic cancer–associated fibroblasts (CAFs) overexpress the Hedgehog receptor SMO. Here, immunohistochemical labeling highlights overexpression of Smo protein in a human primary pancreatic adenocarcinoma. Strong Smo expression is detected in stromal fibroblasts adjacent to pancreatic cancer cells. For details, see the article by Walter and colleagues on page 1781 of this issue.
