Correction: Lysosomal Sequestration of Sunitinib: A Novel Mechanism of Drug Resistance

Correction: ABCB1 (MDR1) Polymorphisms and Progression-Free Survival among Women with Ovarian Cancer following Paclitaxel/Carboplatin Chemotherapy
ABOUT THE COVER

B7H3 represents a novel driver of gliomagenesis by mediating an immunosuppressive and proinvasive phenotype in glioblastoma. Immunofluorescence demonstrates the perivascularly (alpha-SMA staining; red) enhanced expression of B7H3 (vesicular distribution; green) in human glioblastoma tissue (nuclei staining; blue). For details, see the article by Lemke and colleagues on page 105 of this issue.
