**About the Cover**
Aberrant L1 cell adhesion molecule (LICAM) affects tumor behavior and chemosensitivity in anaplastic thyroid carcinoma (ATC). LICAM is highly expressed in ATC cells, but not in nodular hyperplasia or papillary thyroid carcinoma (PTC) cells. LICAM plays an important role in the aggressiveness of ATC by enhancing proliferation, migration, invasion, and chemoresistance. Photomicrograph showing immunohistochemical staining for LICAM in PTC tissue. 200X magnification. For details, see the article by Kim and colleagues on page 3071 of this issue.
