ABOUT THE COVER

Loss of S6 phosphorylation as a biomarker of response to PI3K/mTOR pathway inhibition. The representative image shows immunohistochemical staining for phosphorylated S6 protein (ser235-236) in SUM1350 breast cancer cell line xenografts treated with the pan-PI3K inhibitor BKM120. For details, see the article by O’Brien and colleagues on page 3507 of this issue.
