ABOUT THE COVER

The cover shows the crystal structure of the SAR650984-Fab in complex with human CD38 resolved at 1.53 Å resolution. A close-up view of the epitope highlights the interface between human CD38 and SAR650984-Fab, which involves mainly antibody heavy chain CDR loop H3 (yellow) and light chain CDR loops L1, L2 and L3 (green). For details, see the article by Deckert and colleagues on page 4574 of this issue.
