SPECIAL FEATURES

275  Stressing the Development of Small Molecules Targeting HSP90
Len Neckers and Jane B. Trepel
See related article, p. 445

278  Pertuzumab Protects the Achilles’ Heel of Trastuzumab—Emtansine
William R. Gwin and Neil L. Spector
See related article, p. 456

CCR Perspectives in Drug Approval

281  Predictive Value of Phase I Trials for Safety in Later Trials and Final Approved Dose: Analysis of 61 Approved Cancer Drugs
Denis L. Jardim, Kenneth R. Hess, Patricia LoRusso, Razelle Kurzrock, and David S. Hong

Molecular Pathways

289  Molecular Pathways: Targeting Inhibitor of Apoptosis Proteins in Cancer—From Molecular Mechanism to Therapeutic Application
Simone Fulda

296  Molecular Pathways: Transcription Factories and Chromosomal Translocations
Cameron S. Osborne

ABOUT THE COVER
The cover shows a section of a lymph node biopsy from a patient with mantle cell lymphoma. Hematoxylin and eosin staining shows typical monomorphous small-to-medium-sized lymphoid cells with irregular nuclei. For details, see the article by Moros and colleagues on page 393 of this issue.
