CORRECTION

2412 Correction: Ceritinib for the Treatment of Late-Stage (Metastatic) Non–Small Cell Lung Cancer
ABOUT THE COVER

The cover shows a section of a bone marrow biopsy from a patient with acute myeloid leukemia (AML). Immunohistochemical staining shows Desert Hedgehog positive osteoblasts underlining the hypothesis of paracrine Hedgehog pathway activation in AML cells. For details, see the article by Wellbrock and colleagues on page 2388 of this issue.
