AACR Bulletin Board

AACR

The American Association for Cancer Research (AACR), founded in 1907 to bring together active investigators of the cancer problem for the presentation and discussion of new findings and to foster advances in cancer research. Today the Association has 13,000 members working in all the major cancer research fields and is a leader in the subdivisions of cancer research in the United States, Canada, and more than 60 other countries. Information on AACR programs and activities can be obtained from American Association for Cancer Research Publish Online 150 South Independence Mall West Suite 826 Philadelphia, PA 19106-3483 Phone: (215) 440-9300 Fax: (215) 440-9333 Email: aacr@aacr.org The AACR welcomes applications for membership from the readership. Scientists engaged in all areas of cancer research are eligible for membership. There are three categories of membership: active membership, open only to cancer researchers working in the Americas; corresponding membership, to those working outside the Americas; and associate membership, to students and postdoc fellows, and physicians-in-training. Further information on the qualifications for each category as well as the benefits of membership can be found on the application forms at the back of this issue.

There is no official application form for this award. The nomination package should consist of the following:

- The candidate’s curriculum vitae and full list of published works;
- An indication of the candidate’s most important publications;
- A letter of recommendation in English (500 words, maximum) explaining why the candidate is deserving of this prestigious Award. This letter should summarize the candidate’s major scientific achievements, indicate which of the candidate’s publications best describe these achievements and point to the impact of these achievements on progress in cancer research.

Nominators are asked to maintain the confidentiality of the nomination information the candidate refrain from informing the candidate about the nomination.

The deadline for receipt of nominations by the AACR is October 1, 1999, for the 1999 Award. Questions about the nomination process should be directed to the AACR Office via FAX at (215) 440-9313 or E-mail at aacr@aacr.org. Candidates must submit the original plus 15 copies of their nominations: AACR-Pezcoller International Award for Cancer Research nominations to the American Association for Cancer Research, Inc., Public Ledger Building, Suite 826, 150 South Independence Mall West Philadelphia, PA 19106-3483, USA.

Call for Nominations for AACR Awards

The AACR presents six awards to distinguished scientists at its Annual Meeting. The Awards Committee, consisting of six separate subcommittees, will recommend candidates for each award to the AACR Executive Committee. Following is a description of each award. Members wishing to make nominations should provide a short description of the candidate's accomplishments; the subcommittee involved will obtain further documentation on suitable candidates. Nominations may be directed to the Association for forwarding to the appropriate subcommittee. This material should be received no later than September 1, 1999.

Clowes Memorial Award

The Eli Lilly Company established the Clowes Memorial Lecture to honor Dr. G. H. A. Clowes, a founder of the AACR and a research director of Eli Lilly. The purpose of the award is to give "recognition of outstanding research accomplished in some recent period." The Clowes Award should recognize outstanding recent accomplishments in both basic cancer research and the Board of Directors continue to support the original goals for research and epidemiological investigations.

Joseph H. Burchenal AACR Clinical Research Awards

Bristol-Myers Squibb has established this award to recognize outstanding achievements in clinical cancer research. It is named for Dr. Joseph H. Burchenal, past president and honorary member of the American Association for Cancer Research. BMS has agreed that this award be made by any scientist who is now or has been affiliated with an institution engaged in cancer research. Institution members may be selected for this award, and candidates may not nominate themselves.

Institution of Page Charges

Effective January 1998, a page charge of $50 per printed page will be levied on all manuscripts published in Clinical Cancer Research. It is understood at the time of submission that the author(s) agree to pay this charge in the event of publication. Under exceptional circumstances, when no other source of grant or other support exists, the author(s) may request an exception to this charge. For information on AACR Publications Department (see page ii for address) at the time of submission for a waiver of the page charges. All such requests will be reviewed, and appropriate institutional official stating that no funds are available for the payment of page charges.

1999 Annual Meeting

The AACR’s Annual Meeting is one of the largest and most important cancer research forums, sight, and translational research. Over 10,000 attendees from 46 countries.

Call for Nominations for 1999 AACR-Pezcoller International Award for Cancer Research

The AACR-Pezcoller International Award for Cancer Research is given annually to a scientist who has made a major contribution in the field of cancer research, who continues to be active in the field, and whose ongoing work holds promise for future contributions to cancer research. The Pezcoller Foundation was established in 1982 by Professor Alessio Pezcoller, a dedicated Italian surgeon who has made important contributions to medicine during his career and who, through his foresight, vision, and generous gift in support of the formation of the Foundation, stimulated others to make significant contributions in the field of cancer research. The American Association for Cancer Research (AACR) was founded in 1907 by physicians and scientists dedicated to the conquest of cancer research. Over the past decade, the Pezcoller Foundation has established the American Association for Cancer Research (AACR) as a leader in the field of cancer research, and has served as an example to other organizations world-wide. The American Association for Cancer Research (AACR) is a scientific organization with more than 10,000 members who are engaged in all areas of cancer research, from basic to clinical. The AACR promotes scientific exchange and publication of research findings through its annual meetings, symposia, and other events. The AACR also supports cancer research through its publications, including The Journal of the National Cancer Institute and Cancer Research. Over the past decade, the Pezcoller Foundation has contributed to the study of cancer at a scientific level, and has supported cancer research activities in the United States, Canada, and throughout the world. The AACR is committed to promoting excellence in cancer research and has contributed to the advancement of cancer research through its support of research programs and educational activities. The AACR promotes the development of new treatments for cancer, and supports the training of new investigators in the field.

Awards

The AACR presents six awards to distinguished scientists at its Annual Meeting. The Awards Committee, consisting of six separate subcommittees, will recommend candidates for each award to the AACR Executive Committee. Following is a description of each award. Members wishing to make nominations should provide a short description of the candidate’s accomplishments; the subcommittee involved will obtain further documentation on suitable candidates. Nominations may be directed to the Association for forwarding to the appropriate subcommittee. This material should be received no later than September 1, 1999.

Clowes Memorial Award

The Eli Lilly Company established the Clowes Memorial Lecture to honor Dr. G. H. A. Clowes, a founder of the AACR and a research director of Eli Lilly. The purpose of the award is to give "recognition of outstanding research accomplished in some recent period." The Clowes Award should recognize outstanding recent accomplishments in both basic cancer research and the Board of Directors continue to support the original goals for research and epidemiological investigations.

Joseph H. Burchenal AACR Clinical Research Awards

Bristol-Myers Squibb has established this award to recognize outstanding achievements in clinical cancer research. It is named for Dr. Joseph H. Burchenal, past president and honorary member of the American Association for Cancer Research. BMS has agreed that this award be made by any scientist who is now or has been affiliated with an institution engaged in cancer research. Institution members may be selected for this award, and candidates may not nominate themselves.

Instructions for Authors

Scope
Clinical Cancer Research, a journal of the American Association for Cancer Research, publishes original articles describing clinical research on the cellular and molecular characterization, prevention, diagnosis, and therapy of human cancer. Its focus is on innovative clinical research and translational research which bridges the laboratory and the clinic. Clinical Cancer Research is especially interested in clinical trials evaluating new treatments for cancer; research on molecular abnormalities that predict incidence, response to therapy, and outcome; and laboratory studies of new drugs and biological agents that will lead to clinical trials in patients.

Specific areas of interest include clinical and translational research in: molecular pharmacology and chemotherapy; drug sensitivity and resistance; tumor immunology and immunotherapy; radiobiology and radiation oncology; solid tumor oncology; hematological malignancies; surgical oncology; pediatric oncology; molecular oncology and cancer genes; pathology, markers, and prognostic indicators; growth factors, cytokines, and signal transduction; bone marrow transplantation; gene therapy; cancer endocrinology; cell adhesion, invasion, and metastasis; prevention of primary and recurrent cancer; differentiation and cell death; clinical genetics; and detection of minimal disease.

Editorial Policy
When a manuscript is received for consideration, the Editors assume that no similar paper has been or will be submitted for publication elsewhere. Further, it is understood that all authors listed on a manuscript have agreed to its submission. The signature of the corresponding author on the letter of submission signifies that these conditions have been fulfilled.

Journal policy requires that authors, reviewers, Associate Editors, and Senior Editors reveal in a letter to the Editor-in-Chief any relationships that they have that could be construed as causing a conflict of interest with regard to a manuscript under review. The letter should include a statement of any financial relationships with commercial companies involved with a product under study.

Upon acceptance, authors must transfer copyright to the American Association for Cancer Research, Inc., the copyright owner of the journal, prior to publication. Once an article is accepted for publication in Clinical Cancer Research, the information therein is embargoed from reporting by the media until the mail date of the issue in which the article appears.

The Editors endorse the principles embodied in the Declaration of Helsinki and expect that all investigations involving humans will have been performed in accordance with these principles. To obtain a copy of the Helsinki Declaration, please contact the World Medical Association, 28, Ave. des Alpes, F-01210, Ferno-Voltaire, France. For animal experimentation reported in the journal, it is expected that investigators will have observed the Interdisciplinary Principles and Guidelines for the Use of Animals in Research, Testing, and Education issued by the New York Academy of Sciences’ Ad Hoc Committee on Animal Research, a copy of which is available for $5.00 from the Marketing Department, New York Academy of Sciences, 2 East 63rd Street, New York, NY 10021-7289. All human and animal studies must have been approved by the investigator’s Institutional Review Board.

Review Process
The review process is conducted as rapidly as possible. Each submitted manuscript is reviewed by at least two experts in the field of investigation. If the authors are invited to submit a revised manuscript for an expedited further review, the revised version must be submitted within three months.

Publication Fees
A page charge of $50 per printed page will be levied on all manuscripts accepted for publication. It is understood at the time of submission that the author(s) agree to pay this charge in the event of publication. Under exceptional circumstances, when no grant or other source of support exists, the author(s) may apply to Dr. Margaret Foti, Director of Publications, AACR Publications Department (see page ii for address) at the time of submission for a waiver of the page charges. All such applications must be counter-signed by an appropriate institutional official stating that no funds are available for the payment of page charges.

Procedures for Submission
Submit papers directly to the Deputy Editor or to one of the seven Senior Editors, each of whom is responsible for a particular area of research. The Deputy Editor and the Senior Editors will conduct the review process with the expert assistance of the journal’s Associate Editors, who will correspond with authors about their manuscripts, and will make editorial decisions regarding publication. Papers within the subject areas covered by the Editor-in-Chief, as well as manuscripts that do not pertain to any of the research areas listed, should be submitted to Dr. Mendelsohn. Research areas, mailing addresses, and telephone and fax numbers for the Editor-in-Chief, Deputy Editor, and Senior Editors can be found at the end of these Instructions.

Submit four original sets (not photocopies) of figures along with four copies of the manuscript. If a manuscript is closely related to papers that are in press or have been submitted elsewhere, please provide copies of those papers with your submission. For both original and revised submissions, we cannot guarantee that manuscripts and illustrations will be returned to the author.

The letter of submission can suggest the Associate Editors who might serve as reviewers of the manuscript. In addition, we invite authors to provide the names, addresses, and telephone/fax numbers of other potential reviewers who are not current or recent collaborators or advisors in the area under investigation.

Advances in Brief will be reserved for concise, definitive reports of novel observations and discoveries that have unusual importance. A request for consideration for Advances in Brief should be included in the letter of submission. A MiniReview is a brief analysis (typically 3-4 printed pages) of a focused, timely research topic, aimed at a multidisciplinary audience. MiniReviews and Controversies in Clinical Cancer Research that are submitted or solicited will undergo editorial review. The Editors welcome Letters to the Editor, which will be published if they are determined to be appropriate.

Format
Manuscripts must be written succinctly in clear, grammatical English. Define abbreviations in an inclusive footnote to the text. Double-space on 8 1/2 x 11-inch paper. Dot-matrix printing is not acceptable. The format is as follows:

1. Title page, including title, authors and their institutions, research support, and address plus telephone/fax numbers of the corresponding author;
2. A running title of fewer than 50 characters;
3. Three to five key words that do not appear in the title;
4. Abstract, of not more than 250 words, stating briefly the objectives, methods, results, and conclusions of the study;
5. Text arranged in this order: Introduction, Methods, Results, Discussion, Acknowledgments, References;
6. Footnotes, on a page separate from the text. Designate footnotes consecutively with superscript Arabic numerals;
7. Tables, on pages separate from the text, with descriptive titles and legends that make the data self-explanatory without reference to the text;
8. Figure legends, on pages separate from the text, with descriptive titles and explanations to make the data understandable without reference to the text. Define all symbols and include staining for halftones where applicable;

References
Include only those articles that have been published or are in press. Unpublished data or personal communications must be cited as footnotes to the text. Personal communications should be substantiated by a letter of permission. Number references in the order of their first mention in the text. Cite only the number assigned to the reference. References must be double-spaced.
SAMPLE REFERENCES:

Figures
Provide four original sets of figures (whether line-cut drawings or halftones). Each sorted set should be in a separate labeled envelope, for distribution to reviewers. A typed label placed on the reverse side of each figure should contain the first author’s name, figure number, and an arrow indicating top of figure. Letters and numbers on figures should not be smaller than 6-point or larger than 12-point type. All figures will be published at a width of approximately 3 inches (8 cm) unless the author requests a greater width. Use tissue overlays to indicate important areas of the photographs that must be reproduced with greater fidelity.

Authors are encouraged to submit color figures. The expense of reproducing color photographs must be offset partially by the author. The cost of color reproduction charged to authors is $975 per color figure. Submit color figures on flexible backing.

Proofs
Page proofs must be returned to the office of the American Association for Cancer Research within 24 hours of receipt. Return proofs by overnight mail. Proofs not received by the deadline will be published without the authors' corrections. Accepted manuscripts are regarded as final copy and should not be altered substantially in proof. Extensive alterations could cause publication delays, and authors will be charged for excessive alterations in proof.

Typesetting Manuscripts from Computer Disks
Clinical Cancer Research requests the submission of disks to expedite production of accepted manuscripts. If your article is accepted for publication, you will receive instructions regarding disk submission. It is the author’s responsibility to ensure that the material on the disk matches the final accepted version of the manuscript.

Research Areas of the Editor-in-Chief, Deputy Editor, and Senior Editors
John Mendelsohn, M.D., Editor-in-Chief
Department of Educational Publishing Services–227
The University of Texas M. D. Anderson Cancer Center
1515 Holcombe Boulevard
Houston, TX 77030
Phone: (713) 792-6014; Fax: (713) 792-6016
E-mail: jmendelsohn@notes.mdacc.tmc.edu

Growth factors, hormones, cell growth; radiation therapy, surgery, subspecialty investigation

Wu Ki Heng, M.D., Deputy Editor
Department of Thoracic/Head & Neck Medical Oncology
The University of Texas M. D. Anderson Cancer Center
Box 80
1515 Holcombe Boulevard
Houston, TX 77030
Phone: (713) 792-6363; Fax: (713) 796-8655
E-mail: wuanki.heng@isqm.mda.uth.tmc.edu

Clinical trials targeted at specific malignancies; chemoprevention

Bruce A. Chabner, M.D.
Department of Hematology/Oncology
Massachusetts General Hospital
Cox Building, Room 640
100 Blossom Street
Boston, MA 02114
Phone: (617) 724-3200; Fax: (617) 724-3166
E-mail: chabner.bruce@mgh.harvard.edu

Clinical pharmacology and pharmacodynamics, drug metabolism, drug sensitivity and resistance, drug interactions

Michael B. Kastan, M.D., Ph.D.
Department of Hematology-Oncology
St. Jude Children’s Research Hospital
332 N. Lauderdale St.
Memphis, TN 38105-2794

BENEFITS OF MEMBERSHIP
The American Association for Cancer Research (AARC), a scientific society of over 13,500 laboratory and clinical cancer researchers, was founded in 1907 to facilitate communication and dissemination of knowledge among scientists and others dedicated to the cancer problem; to foster research in cancer and related biomedical sciences; to encourage the presentation and discussion of new and important observations in the field; to foster public education, science education, and training; and to advance the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world.

Members of the AARC enjoy the following benefits:
1. the privilege of sponsoring a proffered paper (abstract) for consideration for presentation at the AARC annual meeting;
2. subscriptions to the Association’s high-quality journals Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, and Cancer Epidemiology, Biomarkers & Prevention at reduced member rates;
3. an advance copy of the Program and Proceedings of the American Association for Cancer Research that contains over 4,000 abstracts of proffered papers presented at the annual meeting;
4. reduced registration rates at annual meetings;
5. priority notice of small, focused meetings in the AARC’s exciting series of Special Conferences in Cancer Research;
6. substantially reduced registration rates for Special Conferences;
7. opportunities for participation in AARC meetings in North America and abroad with other scientific societies around the world;
8. receipt of AARC Newsletters and other important announcements;
9. early notification of and reduced rates for participation in the AARC Employment Register;
10. an up-to-date Membership Directory of over 13,500 member researchers in the cancer field;
11. the professional benefits of the AARC’s public education activities concerning funding for cancer research and press coverage of the latest research findings;
12. the opportunity to participate in three Summer Workshops that foster knowledge in the cancer field for young investigators;
13. the facilitation of informal scientific exchange with leading researchers in the cancer field; and
14. many more ongoing benefits.

QUALIFICATIONS FOR MEMBERSHIP
Active membership in the AARC is open to investigators who live in the Americas. Individuals who have conducted two years of research resulting in peer-reviewed publications relevant to cancer, or who have made substantial contributions to cancer research in an administrative or educational capacity, are eligible. If a candidate has conducted research in an area of biomedical science related to cancer, he or she will qualify for membership. Evidence of patents relevant to cancer research may be submitted as qualifications for membership in lieu of peer-reviewed publications.

Corresponding membership is open to persons who are not residents of the Americas. The qualifications for corresponding membership are the same as those indicated above for active membership. Visiting scientists from outside the Americas who intend to return to their countries of origin by the anticipated time of election should apply for corresponding membership. All other visiting scientists should apply for active membership and transfer to corresponding status upon leaving the Americas.

Graduate and medical students, postdoctoral fellows, and physicians in training who do not yet meet the above qualifications for active or corresponding membership should apply for associate membership. Forms for associate membership are available from the AARC Office.

PROCEDURES FOR APPLICATION
There are three deadlines for the receipt of a membership application: January 1, May 1, and September 1 of each year. The Membership Committee will review all complete applications for active membership that have been received by these deadlines and will submit recommendations on each candidate to the Board of Directors which formally elects all members. The same procedure is followed by the Special Memberships Committee which receives applications for corresponding membership. Candidates will be notified according to the following schedule:

<table>
<thead>
<tr>
<th>Receipt of Application in AARC Office</th>
<th>Notification of Candidate</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 1</td>
<td>March</td>
</tr>
<tr>
<td>May 1</td>
<td>July</td>
</tr>
<tr>
<td>September 1</td>
<td>November</td>
</tr>
</tbody>
</table>

A complete application consists of the following material:
1. 6 copies of the form on the opposite side of this page, with all requested information provided.
2. 5 copies of the candidate’s most current curriculum vitae and bibliography.
3. 5 copies of a letter of recommendation from a nominator who is an active, corresponding, emeritus, or honorary member of the AARC (at least one copy must be a signed, original letter). This letter should describe the candidate’s achievements in laboratory research, clinical investigations, or epidemiological research, and it should affirm that this research adheres to accepted ethical scientific standards. –OR– The nominator may supply the responses requested at the bottom of the application form in the section entitled “STATEMENT OF SUPPORT” (at least one copy of the form must be the signed original).
4. 5 copies of a letter of recommendation as described in Item 3 above from a secondor who is an active, corresponding, emeritus, or honorary member of the AARC (at least one copy must be a signed, original letter). –OR– The seconder may supply the responses requested at the bottom of the application form in the section entitled “STATEMENT OF SUPPORT” (at least one copy of the form must be the signed original).
5. 5 reprints of each of two publications on which the candidate appears as author. As noted above, evidence of patents developed by the candidate may be submitted in lieu of one or both of the publications. If submitting patents, supply patent number and year awarded.

All material should be collated into five complete sets with the original application form as a covering document and sent to the address given below. Questions regarding procedures for membership application may also be directed to the following address:

Membership Services Department
American Association for Cancer Research
Public Ledger Building, Suite 826
150 S. Independence Mall West
Philadelphia, PA 19106-3483
Phone: 215/440-9300
FAX: 215/440-9412
E-mail: aacr@aacr.org

RESPONSIBILITIES OF MEMBERSHIP
Candidates should be aware of the following responsibilities of membership in the AARC. Active members must pay annual dues. In 1998 annual dues for active members are $175, $100 of which is designated for AARC journal subscriptions. Newly elected members of the AARC who have already purchased subscriptions to Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, or Cancer Epidemiology, Biomarkers & Prevention at the higher, nonmember rates will receive reimbursement of the unused portion of those subscriptions once their first year’s membership dues are paid in full.

Corresponding members are required to pay dues ($100 in 1998) and may, if they wish, subscribe to Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, or Cancer Epidemiology, Biomarkers & Prevention at reduced member rates.

Applicants elected in March will be responsible for payment of that year’s dues; applicants elected in July and November will pay dues for the following year. Applicants elected in March and July will be eligible to sponsor an abstract for the next annual meeting. Every effort will be made to afford the same opportunity to applicants elected in November.

Margaret Tofi, Ph.D.
Executive Director

STATEMENT OF SUPPORT

Instead of submitting letters of recommendation, either the nominator or the seconder or both may complete the following section:

I acknowledge by signing this statement of support that this candidate adheres to accepted ethical scientific standards and has or will make a long-term contribution to cancer research.

______________________________________________________________________________

Signature of Nominator*  Date  Signature of Seconder*  Date

See Guidelines for Application on the reverse side of this form for further instructions.

*Both nominator and seconder must be active, corresponding, emeritus, or honorary members of the AACR in good standing.

(This form may be reproduced.)
GUIDELINES FOR APPLICATION FOR ASSOCIATE MEMBERSHIP

QUALIFICATIONS FOR MEMBERSHIP

Associate membership is open to graduate students, medical students, postdoctoral fellows, and physicians in training who are following a course of study or who are working in a research program relevant to cancer. Scientists in training who already have a substantial record of publications may wish to apply for active or corresponding membership which confers full benefits of membership.

BENEFITS OF MEMBERSHIP

The American Association for Cancer Research (AACR), a scientific society consisting of laboratory and clinical cancer researchers, was founded in 1907 to facilitate communication and dissemination of knowledge among scientists and others dedicated to the cancer problem; to foster research in cancer and related biomedical sciences; to encourage presentation and discussion of new and important observations in the field; to foster public education, science education, and training; and to advance the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world. Associate members of the AACR enjoy the following benefits:

1. the privilege of sponsoring a proffered paper (abstract) for consideration for presentation at the AACR annual meeting provided that (a) the associate member is the presenter of the paper and (b) an active, corresponding, emeritus, or honorary member in good standing of the AACR also signs the abstract of the paper in support of the work. (In this instance, the member who cosigns the abstract does not lose his or her own sponsorship privilege.);
2. optional subscriptions to the Association’s high-quality journals: Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, and Cancer Epidemiology, Biomarkers & Prevention at reduced member rates; beginning in 1998 associate members will be able to purchase AACR journals for half the price of a regular member subscription;
3. the privilege of registering for the annual meeting at the low associate member rate;
4. the privilege of electing an Associate Member Council that organizes programs benefiting associate members and that presents their concerns to the AACR Board of Directors;
5. the opportunity to stand for election to the Associate Member Council;
6. preferred access to the AACR Employment Register;
7. priority notification of events in the AACR’s series of special conferences on timely subjects in the field;
8. substantially reduced registration rates at special conferences;
9. the receipt of AACR newsletters, meeting announcements, and an up-to-date Membership Directory;
10. the opportunity to participate in three Summer Workshops that foster knowledge in the cancer field for young investigators; and
11. the facilitation of informal scientific exchange with leading researchers in the cancer field.

PROCEDURES FOR APPLICATION

Persons wishing to apply for associate membership must use the official application form on the reverse side of these instructions. Each candidate for associate membership must be nominated by an active, corresponding, emeritus, or honorary member in good standing of the AACR. Three completed copies of the form should be submitted; at least one of these copies must carry the original signatures of both the candidate and the nominator. In addition, the candidate should submit one copy of his or her curriculum vitae. The application form may be submitted to the Association Office at any time.

After review of applications for associate membership, the Executive Director will notify candidates of their election or deferral within one month of the receipt of the application form. A check for one year’s dues payment must accompany the application. Dues for 1998 are $55 for associate members residing in the Americas and $65 for residents of other countries. This fee will be refunded to any candidate deemed to be ineligible for associate membership. Checks should be in U.S. currency, made payable to AACR, Inc., and drawn on a U.S. bank. Send the three copies of the application form and the appropriate dues payment to:

Membership Services Department
American Association for Cancer Research
Public Ledger Building, Suite 826
150 S. Independence Mall West
Philadelphia, PA 19106-3483
Phone: 215/440-9300
Fax: 215/440-9412
E-mail: aacr@aacr.org

RESPONSIBILITIES OF MEMBERSHIP

Associate members must pay annual dues in an amount to be determined by the AACR Board of Directors. Dues for 1998 have been set at $55 per year for residents of the Americas and $65 for residents of other countries. If an application is submitted by August 31, the accompanying dues payment will be credited to the current year. Candidates submitting applications between September 1 and December 31 may indicate whether they wish their dues payments credited to the current or forthcoming year. Candidates should be aware, however, that associate members may sponsor an abstract for the annual meeting only if their dues for the current year are paid. For example, an associate member submitting an abstract in November 1998 for the forthcoming annual meeting must have paid dues for 1998. Any newly elected associate members of the AACR who have already purchased subscriptions to Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, or Cancer Epidemiology, Biomarkers & Prevention at the higher, nonmember rate will receive a refund for the unused portion of that subscription upon receipt of their payment for a member’s subscription.

Each Fall the AACR will send to current associate members an invoice for dues for the forthcoming year. Payment of this invoice must be accompanied by a statement signed by the associate member’s current registrar, dean, or department head, verifying the member’s current academic status. The Association’s By-Laws state that dues are payable for each year in advance by January 1 of the year to which they should be applied. An individual may be an associate member for a maximum of five years. Each year in which an individual pays dues will count as one full year of associate membership. Thus, an associate member who pays dues for 1998 may retain associate membership until December 31, 2002. The Board of Directors may terminate the membership of an associate member whose dues are in arrears for two years.

SIGNATURES

I hereby apply for associate membership in the American Association for Cancer Research. I have read the instructions on the reverse side of this form, and I understand the privileges and responsibilities of this class of membership. I certify that the statements on this application are true.

Signature of Candidate: ____________________________ Date: ____________________________

I recommend this candidate for associate membership in the American Association for Cancer Research. To the best of my knowledge, the candidate is qualified for this class of membership, and the statements on this application are true.

Signature of Nominator*: ____________________________ Date: ____________________________

Submit three copies of this form. At least one copy must contain the original signatures of the candidate and the nominator. In addition, submit one copy of your curriculum vitae. Enclose a check in U.S. funds, made payable to AACR, Inc., and drawn on a U.S. bank for one year’s dues. For 1998, dues are $55 for associate members residing in the Americas and $65 for residents of other countries.

Check one of the following boxes only if this form is being submitted between September 1 and December 31:

☐ The enclosed dues payment should be applied to the current calendar year.

☐ The enclosed dues payment should be applied to the forthcoming calendar year.

NOTE: If dues are applied to the forthcoming year, membership will take effect on January 1, but the candidate will not be eligible to sponsor an abstract for presentation at the annual meeting in March or April of that year.) See Guidelines for Application on the reverse side of this form for further instructions.

*Nominee must be active, corresponding, emeritus, or honorary member of the AACR in good standing.

- Signature
- SLiTeX
- SmartWhere
- SmartWrite II
- Software packages that we are unable to translate:

- FrameMaker
- PageMaker
- Ready, Set, Go
- Scientific Writer

Disks produced on IBM or IBM-compatible computers are preferred, but those produced on some Apple or Wang computers can also be converted. Because of the file structures and internal coding, we cannot accept disks created on desktop publishing systems or those created on proprietary typesetting systems. We also cannot guarantee that all special characters can be translated. Tabular and mathematical material, such as equations, will not be captured from the disk but will be rekeyed.

To expedite work and for your own security, we do require that you submit a hard copy printout of the disk file. The tables and equations will be keyed from this hard copy. We also need to know the name of the file to be converted, the type of hardware (e.g., IBM PC) on which the files were created, the operating system (e.g., DOS 3.3), and the version of the software (e.g., WordPerfect 5.1) used to create the file.

PLEASE FILL OUT ALL INFORMATION ON REVERSE SIDE AND SUBMIT THIS FORM WITH YOUR DISK. DISKS WILL NOT BE PROCESSED WITHOUT THIS INFORMATION.
DISK SUBMISSION FORM

AACR journals are now using personal computers to copyedit manuscripts accepted for publication. When submitting a revised manuscript, authors are encouraged to submit an electronic disk of the paper along with the required four hard copy printouts. Disks will ultimately be returned to the authors.

See reverse for the word processing packages that can be accepted.

File preparation

Please be sure that the file you send is the most recent version of the manuscript and that it matches the most recently submitted printed copy. The file should contain all the parts of the manuscript in one file. Mathematical and tabular material, however, will be processed in the traditional manner and may be excluded from the disk file.

Note: AACR does not assume responsibility for errors in conversion of customized software, newly released software, or special characters.

Please label the outside of the disk with the journal name, the first author’s name, a partial title of the manuscript, and the name of the computer file used to access the manuscript on disk. To process your disk efficiently, we need the following information. Please be sure to provide ALL the information.

Name used to access paper on disk: ________________________________
Name of computer used (e.g., IBM/PS2): ____________________________
Operating system and version (e.g., DOS 3.3): ________________________
Word processing program and version (e.g., WordPerfect 5.0): ________
   [See reverse for acceptable programs.]

Manuscript number: _____________________________________________
First author: ____________________________________________________
Corresponding author (if different from first author): __________________
Telephone/FAX numbers: _________________________________________

AMERICAN ASSOCIATION FOR CANCER RESEARCH
1999 RESEARCH FELLOWSHIPS
For Young Scientists at the Postdoctoral or Clinical Fellow Level

- Research Fellowships in Basic, Clinical, Translational, and Prevention Research will each provide salary support to a young scientist engaged in meritorious cancer research.
- Generous sponsorship of the AACR Research Fellowships is currently provided by organizations including: Amgen, Inc., the American Association for Cancer Research, Bristol-Myers Squibb Oncology, the Cancer Research Foundation of America, and the Sidney Kimmel Foundation for Cancer Research. Additional fellowships may be approved for 1999.

Eligibility

Candidates must have completed the M.D., Ph.D., or other doctoral degree. Candidates must currently be a postdoctoral or clinical research fellow and must have been a fellow for at least two years but not more than five years prior to the year of the award. Academic faculty, graduate or medical students, medical residents, permanent government employees, employees of private industry, and individuals who will receive fellowships from similar programs during the award year are not eligible. A candidate need not be a member of the AACR at the time of application, but must submit an application for membership at that time. He or she must be nominated by an Active or Corresponding Member. Associate Members may not be nominators. Applications are evaluated by a Committee consisting of AACR Members who are experts in basic, clinical, translational, and prevention research.

Selection Process

Applications will receive careful scientific evaluation by a prestigious, multidisciplinary committee consisting of AACR Members who are experts in the basic, clinical, translational, and prevention cancer research. The application deadline is January 15, 1999. To request information and application forms, contact:
