Supplementary figure legends

Supplementary Figure 1. Schematic presentation of the targets of microsatellite markers on chromosome 6 and their relative position to the HLA-A, HLA-B, HLA-C, TNF, and TAP1 genes.

Supplementary Figure 2. Additional cases of immunohistochemical staining of HLA Class I expression using HCA2 monoclonal antibody (A) and CD8+ cells (B) in adult GBM. Each image represents an individual case. Images were taken at 10X (A) and 20X (B) magnification. Scale bar represents 200 µm (A) or 100 µm (B).
