Supplementary Figure S1 Schematic presentation of patients with hepatocellular carcinoma (HCC)

HCC (n=852)
  ↓
Child C (n=55)
  ↓
Child A or B (n=797)
  ↓
Non-curative treatment of HCC (n=246)
  ↓
curative treatment of HCC (n=551)
  ↓
Non-HCV related HCC (n=206)
  ↓
HCC with sustained virological response (n=19)
  ↓
curative treatment of HCV related HCC (n=326)
  ↓
Tumor size > 3cm, tumor number > 3 (n=79)
  ↓
Tumor size ≤3cm, tumor number ≤ 3 (n=247)
  ↓
DNA not available (n=65)
  ↓
Patients included in the study (n=182)
Supplementary Figure S2  One way hierarchical clustering of 122 genes involved in the gene set differentially expressed in HCC-infiltrating mononuclear inflammatory cells of 20 patients with the *IL28B* genotype.
Supplementary Figure S3 Kaplan-Meier curves of time to late recurrence (>1 year) in relation to \textit{IL28B} genotype.

![Kaplan-Meier curves of time to late recurrence (>1 year) in relation to \textit{IL28B} genotype.](image)
Supplementary Figure S4 One way hierarchical clustering of 14 intratumoral immune genes of 20 patients with the *IL28B* genotype.
