Supplementary Data

Figure S2

(A) HAb18G/CD147 mRNA levels in a panel of human pancreatic cancer cells and normal cell lines.
(B) HAb18G/CD147 protein levels in a panel of human pancreatic cancer cell lines (left). Right data incite from Cancer Res 2011; 71: 5020-5029 (Figure 1B).
(C) HAb18G/CD147 protein expression was assessed by immunofluorescence staining. (Left, BxPC3. Magnification: 400X; Right, L3.6pL. Magnification: 1000X).
(D) pSTAT3 and survivin protein levels in a panel of human pancreatic cancer cell lines (left). Right data incite from Cancer Res 2011; 71: 5020-5029 (Figure 1B).
