Supplementary Figure 1 Legend:

**Nimbolide is more cytotoxic than many other chemotherapy agents.** (A) Cell proliferation assay showing viability of GBM cells in the presence of Temozolomide (TMZ) for 72 hours. (B) Cell proliferation assay showing the cytotoxic effect of Nimbolide in comparison with other chemotherapeutic agents. Data is representative of two independent experiments. +p ≤ 0.05; *p ≤ 0.001.
