Supplementary Figure S2: mRNA expression of WNT9A, WNT5A, SFRP4 and DKK1 in four tumor pairs (plexiform neurofibroma and matched MPNSTs from the same patient). For each gene, mRNA levels were normalized such that the median value of 7 dermal neurofibromas was 1.
### WNT9A
- Median value of 7 dermal neurofibromas
- Plexiform neurofibroma
- Matched MPNST

### DKK1

### WNT5A

### SFRP4

**Legend:**

- Red: Median value of 7 dermal neurofibromas
- Green: Plexiform neurofibroma
- Blue: Matched MPNST
