Supplemental Figure 3: A and B, Representative light microscopy images (left panel) showing immunostaining of S100A4 (green) in GSCs gliomas. Images were taken at 200X. Bar graph (right panel) demonstrating the mean staining of mesenchymal marker S100A4. **: P<0.01, Student’s t test. C, Representative light microscopy images (left panel) showing immunostaining of Ly6B.2 (red) in GSCs gliomas. Bar graph (right panel) demonstrating the mean staining of neutrophil marker Ly6B.2. *: P<0.05, **: P<0.01, Student’s t test.
