Supplementary Figure 6
HSP70 levels are unaffected from dAbd C7 treatment.

(A) Western blot analysis of HSP70 protein levels in control or dAbd C7 treated 6647 cells at the indicated time points. (B) Western blot analysis of HSP70 protein levels in EWS tumor samples from control, doxorubicine, dAbd C7 or doxorubicine plus dAbd C7 treated mice. Equal loading was monitored with anti-GAPDH blotting (lower lines).
