ABOUT THE COVER

Dopamine receptor 2 (DR2) expression in SKOV3ip1 tumors *in vivo*. The cover figure shows immunofluorescence colocalization (yellow) of DR2 (red) CD31 (green). Nuclear staining is shown in blue. Dopamine replacement was effective in blocking the growth promoting effects of chronic stress in a mouse model of ovarian cancer. For further details, please see Moreno-Smith and coworkers on page 3649 in this issue.
