

Correction

Correction: The Use of Quantitative Real-Time Reverse-Transcriptase PCR for 5' and 3' Portions of *ALK* Transcripts to Detect *ALK* Rearrangements in Lung Cancers

In this article (Clin Cancer Res 2012;18:4725–32), which was published in the September 1, 2012, issue of *Clinical Cancer Research* (1), the new fusion variants of *ELM4-ALK* in Fig. 4C are incorrect due to a typing error.

Below is the corrected figure.

As a result, the new *EML4-ALK* transcript has a 54 bp deletion, not a 53 bp deletion, in the 5' portion of the original *EML4* exon 10. The number "53" on page 4728, paragraph 6, should be "54." The authors regret the error.
